User Documentation

Installation

1: Ensure Python 3.x is installed - https://www.python.org/downloads/

2: run the install_requirements batch file to download the required modules.

3: run the main.py file

Homepage

Upon entering the application, you will find yourself on the homepage with three buttons, each with their own respective icons. When clicking on a button, it will open its respective window and close the homepage. To return to the homepage, simply press escape from whichever window you are on or close the window.

Calculator

Upon entering the calculator window, you will find a generic calculator with most of the simple functions required in daily life. The calculator allows for keyboard input and backspace to delete numbers. Pressing C on the keyboard clears the calculator.

Notepad

Upon entering the notepad window, you can immediately start typing. Once you want to save your note, simply click the save icon in the top right (the floppy disk). This will open a new window where you can set the name of the file and choose the file location. Pressing the folder button will allow you to browse through your folders and select one you desire.

To open an old note, in the notepad window press the open button to browse through all your files and locate your previously saved note.

Functions

Upon entering the functions window, you will have four functions to choose from, however three of them require an activation subscription. The free function to use is the determinant function.
